Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/25/2008 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,092,578 (Bergmeier et al.).

Regarding claim 16, Figs. 1-5 show a printing press, comprising:

a sheet stack feeder (including 15);

a first lifting apparatus (including 4) for forming an overlapping stream and disposed adjacent the sheet stack feeder (including 15); and

a second lifting apparatus (including 3 and 11) disposed above a first sheet (i.e., the topmost non-separated sheet in the stack of sheets) of the overlapping stream and downstream of the first lifting apparatus (including 4) in a sheet transport direction, the

second lifting apparatus (including 3 and 11) being an air jet aimed in the sheet transport direction substantially tangentially over the first sheet of the overlapping stream, the second lifting apparatus having at least one nozzle (i.e., nozzle on element 3), and the second lifting apparatus (including 3 and 11) having a free jet nozzle (11) in addition to the nozzle (i.e., nozzle on element 3), the free jet nozzle (11) being aimed at the overlapping sheet stream obliquely from above in the sheet transport direction.

Regarding the recitations "for forming an overlapping stream" and "of the overlapping stream", these recitations are statements of intended use that do not distinguish claim 16 from the prior art apparatus of Bergmeier et al.

Allowable Subject Matter

3. Claims 1, 3-8, 12-13, 15 and 17 are allowed.
